Drink your water!

Guidelines by age (1 cup = 8 oz):

1 – 3 years: 5–6 cups/day (45–50 oz) **9–13 years:** males, 10–11 cups/day (80–85 oz); females, 8–9 cups/day (70–75 oz)

4 – 8 years: 7–8 cups/day (55–60 oz) **14–18 years:** males, 12–14 cups/day (96–112 oz); females, 9–10 cups/day (72–80 oz)

The amount of water recommended is a general guideline – water needs may vary based on individual needs.
Please consult your physician/dietitian if you have concerns.

Your fluid goal is: _____ . Fill in the cups to keep track of how much you drink during the day!

➔ **Locate a Pediatric Gastroenterologist**

IMPORTANT REMINDER: This information from the North American Society for Pediatric Gastroenterology, Hepatology and Nutrition (NASPGHAN) is intended only to provide general information and not as a definitive basis for diagnosis or treatment in any particular case. It is very important that you consult your doctor about your specific condition.
